

**First of all, THANK YOU!!!**

## **Background information about project**

The scavenger hunt is cold war spy themed.

The “previous clue” is given to you and will be what is given to the participants.

The “previous clue” will also lead to a flash drive which contains all the other files in this repository (omitting this pdf and the previous clue pdf).

They won’t have any information not included here.

Final message will be the next clue but for you it just says congrats or something.

## **Rules/Suggestions**

You can use any methods you want (internet, coding).

There are multiple ways to solve the problem.

You can download the files off of the repository or not. Copy and pasting, request pull, or download all work.

## **I want feedback**

Too hard?

Too easy?

What confused you?

**Thanks and good luck!!!**
